

Ecolutions

Act Sustainably.
Package Responsibly.

OUR APPROACH

- Strategically develop film, aluminum and paper-based packaging for the Circular Economy
- Focusing on recyclable and compostable products with the lowest possible impact on the environment
- Ensure perfect product protection by providing the appropriate barrier properties
- Cooperation with a wide range of partners, from NGO's to associations and waste companies, to make our mission a reality

More Sustainable Packaging

WE'VE
GOT THIS
COVERED.

Film-based solutions

EcoLAM FAMILY

Mono PE laminate

- Recyclable in the PE film stream*
- Ideal for replacement of non-recyclable complex multilayer structures
- Excellent barrier to oxygen and moisture

EcoVer FAMILY

Mono PP laminate

- Recyclable in the mixed PO stream*
- Various barrier grades available
- Suitable for replacement of non-recyclable complex multilayer structures

Paper-based solutions

EcoPAPER FAMILY

Paper packaging solution for food products

- Recyclable in the paper stream*
- Perfect application for a variety of packaging such as confectionery products
- Runs on existing HFFS & VFFS lines high efficiency and speed
- Paper FSC or PEFC certified available on demand

Aluminum-based solutions

EcoPEELCOVER

Innovative and high performance die cut lid

- Recyclable in the aluminum stream*
- Up to 50% reduction in coating layer compared to standard coextrusion coatings
- Easy peel coating
- High corrosion resistance
- ASI certified aluminum available on demand

* Recyclability in different regions depends on local infrastructure, for more information on your market, please contact our sustainability experts
