

Constantia Home & Personal Care Packaging

Superior product protection
and eye-catching
printing solutions.

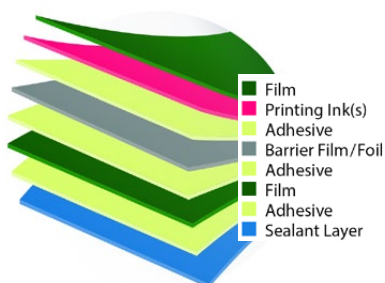

Pamper your products with a customized packaging solution.

CONSTANTIA Promotional Sachet

Combining high resistance against a variety of cosmetic products and demanding burst pressure with high-quality printing technology.

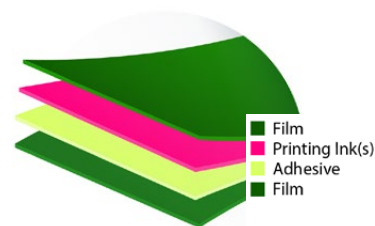

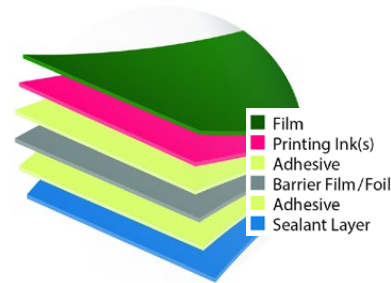

- Aluminum based – standard and PIRA (designed to withstand repeated drop testing according to Smithers Pira procedure)
- Non-aluminum based – metallized and transparent

CONSTANTIA Retail Sachet

High barrier and high protection for manual and mailing distribution of beauty and cosmetic products.

- Aluminum based – standard with optional easy-opening feature or paper based
- Non-aluminum based – metallized, transparent

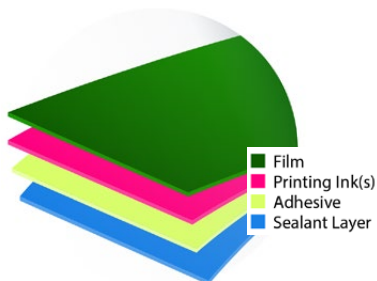

Spotlight your product with premium print quality.

CONSTANTIA Stand-up pouch & Doypack

Combining the highest degree of chemical resistance and outstanding compatibility with injection molded spouts and zippers.

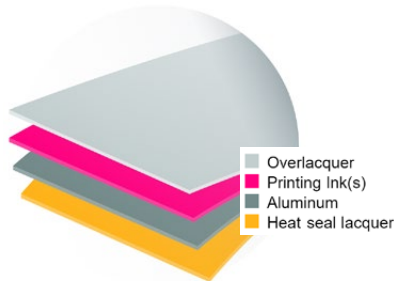

- Mono Polymer

CONSTANTIA Lid

Superior protection for demanding creams, gels, and other cosmetics with easy and clean peeling feature.

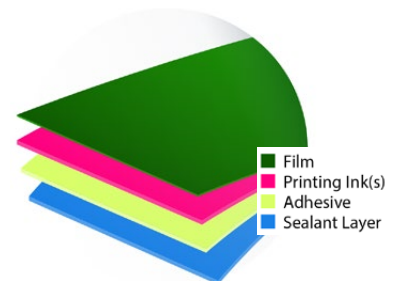

- Standard
- BPA- and epoxy-free

CONSTANTIA Wipe

Packaging Foil for wipes – can improve performance and assist in reducing production waste. It provides enhanced market differentiation along with excellent point of sale appearance.

- Mono Polymer

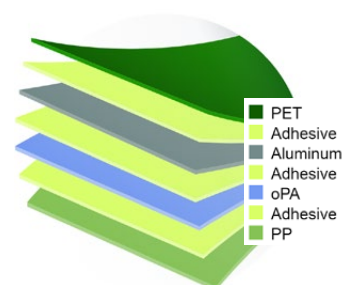

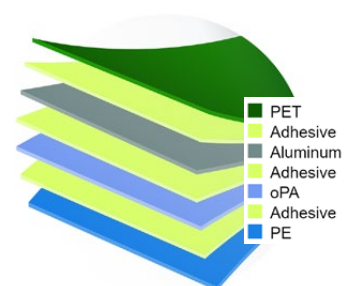

Discover different ways to protect your products.

CONSTANTIA Bag-On-Valve

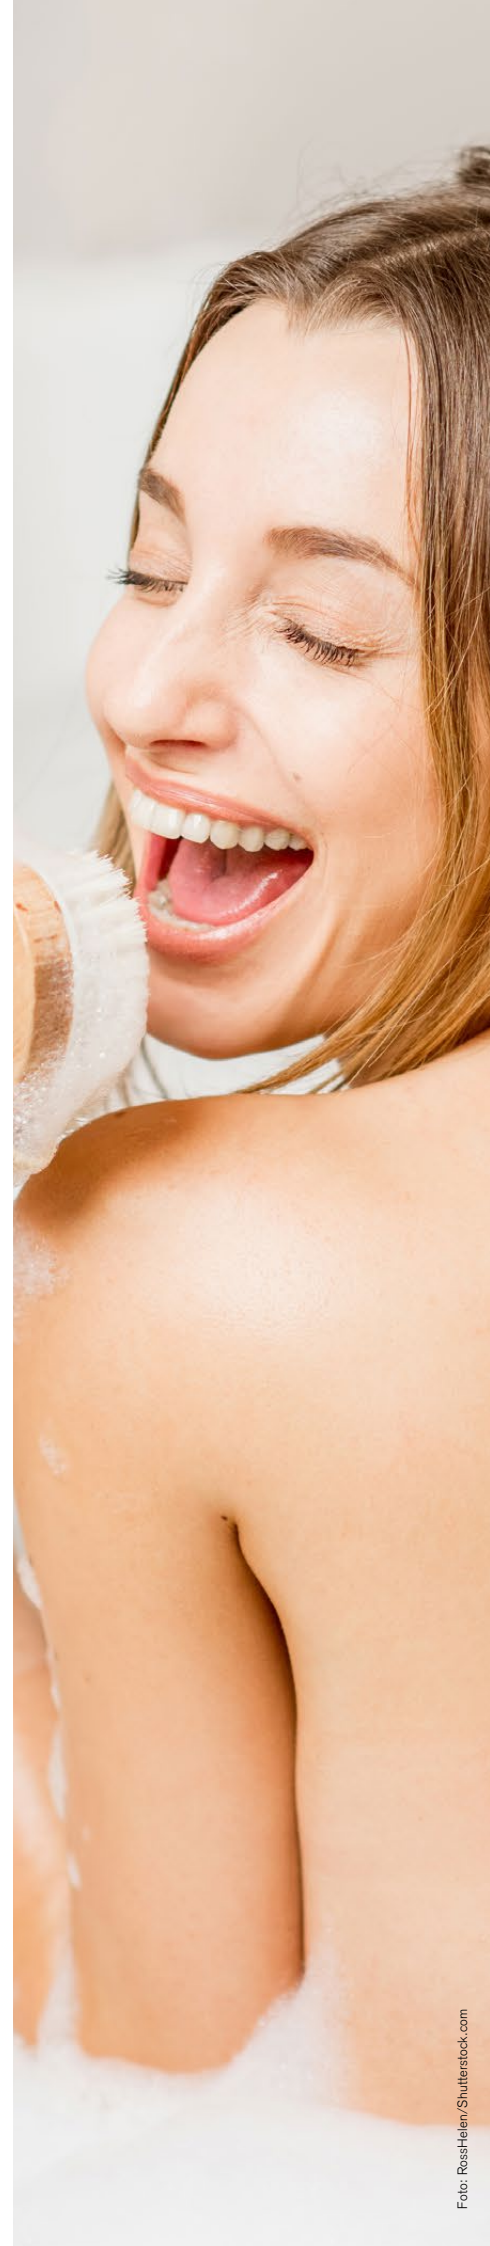

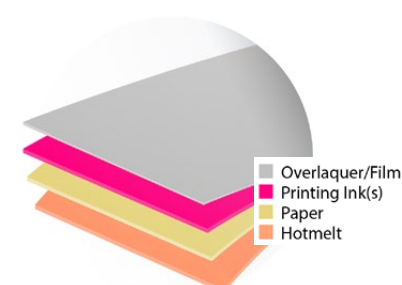

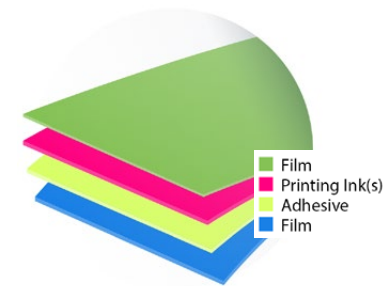

Outstanding protection for products requiring high chemical resistance, strong barrier properties, and excellent burst strength.

- PE
- PP

CONSTANTIA Wrap

Packaging foil for soaps – reliable quality packaging offering suitable protection and ease of handling.

Discover the latest innovations and product developments.

EcoLam

Mono Polymer laminates providing superior performance:

- Recycle ready
- Different structures according to barrier needs (EcoLam, EcoLamPlus, EcoLamHighPlus)
- Reverse-printable by all printing processes
- Strong sealing and line performance
- High gloss or matt appearance

Interactive Packaging

With digitization and smartphone penetration growing rapidly, great opportunities for brand owners and marketers are popping up. Interactive packaging connects your product with the digital world.

- Enrich your packaging digitally
- Create your app
- Control your data

CompresSeal

Micro-embossing of PE or PP sealing layer allows to significantly increase sealing and productivity performance at filling lines

- Improved productivity due to better sealability
- Higher puncture resistance
- Excellent packaging tightness
- Constant coefficient-of-friction under all climate/storage conditions
- Shorter sealing time
= higher sealing speed
- Energy saving in sealing process

Setting the pace of change.

The Constantia way to drive
innovation in packaging.

- Various services are available to facilitate a better understanding of the interactions between packed product and packaging material.
- We also cooperate with pouch-makers to supply a one-stop solution for stand-up pouches and doypacks.
- We can offer solutions for a wide range of laminate finishes like soft-touch, thermosensitive inks, holograms, interactive packaging, etc.

Committed to pushing packaging further.

In order to support and speed up developments, Constantia Flexibles operates a network of facilities and experts dedicated to research.

Competence Centers

specialized in

- Aluminum-based materials
- Film-based materials

Product Excellence Centers

specialized in

- Blister foils
- Laminates

Development Technicians

also providing on-site support

- Development
- Application engineering

Analytical support

- State-of-the-art analytical equipment in our R&D labs allows our experts to characterize materials considered for packaging development in detail.

Pilot manufacturing lines

- Allow manufacturing of samples on a small scale in order to support proof-of-concept studies (by our customers).

Manufacturing

- Our processes meet the highest requirements in terms of quality and hygiene.
- Up-to-date technology allows highest quality rotogravure printing up to 10 colors.
- Designs with up to 8 colors can be realized for personal care short runs.

Quality

- To secure highest product quality, we have implemented certified quality systems in all stages of production.
