

EcoCover^R

The more environmentally friendly Cflex lid along cost-efficiency

▪ **General**

- Performs well on standard packaging lines
- Resource efficient – requires less material
- Easy to peel

▪ **Sustainability**

- Approximately 48% reduction in carbon footprint compared to a standard aluminum die cut lid (Alu 38µm).
- Fully recyclable: Sortable for aluminum-recycling using Eddy-Current-Technology
- Up to 50 % material reduction vs. standard lids

▪ **Technical details**

- Easy and continuous peeling properties
- Good seal through properties
- In combination with UV-Flexo printing completely solvent free
- High corrosion resistance
- Specification's primer is suitable for Flexo, UV Flexo & roto printing technologies
- Alu 20µ semi annealed
- Easy Peel coex coating yet perfect performance on packaging line
- Uniquely developed co-extrusion coating specification by Constantia
- Embossed & unembossed available

▪ **Applications**

- Hot fill
- Cold fill
- Ambient fill
- Aseptic
- Heat pasteurization

▪ **Products**

- Dairy products
- Snacks
- Cereals
- Confectionery
- Beverages
- Home & Personal Care Products
