

EcoLamHighPlus^R

OPE _____
 Met barrier OPE _____
 PE _____

Recyclable mono-PE laminate with high barrier to oxygen and water vapor

▪ **General properties**

- Monomaterial
- Recyclable in the PE film stream (available in most EU countries)
- Ideal for replacement of non-recyclable multi polymer structures, also incorporating aluminum Excellent barrier to oxygen and water vapor
- Available Metallized / White and Gloss / Matt
- Printable by Rotogravure and Flexo
- Enhanced thermal resistance of outer surface
- Heat sealable (inside-inside and inside-outside). Lock seal or peel seal
- Easy tear opening possible
- Effective barrier to MOSH/MOAH

▪ **Structure**

OPE/ met barrier OPE / PE

▪ **Certificates**

Recyclable

Recyclable

Technology approval

▪ **Applications**

- VFFS, HFFS
- Hot filling
- Modified atmosphere
- Pasteurizable

▪ **Products**

- Snacks
- Cereals
- Processed food
- Confectionery
- Beverages
- Hygiene and Home Care Products
