

The paper-based solution for reel fed lidding applications

WHAT IS ECOPAPERLIDDING?

EcoPaperLidding provides a paper-based solution for reel fed lidding applications. It has been specifically developed as a recyclable alternative to Flexpap in FFS lines.

KEY BENEFITS

- Paper-based (up to 90%)
- Metal-free
- Heat sealable against PS, PET and PLA bottom webs and containers
- Peelable
- Recyclable in the paper stream
- Good machinability in FFS lines
- PVC-free

SUSTAINABILITY

The unique design of EcoPaperLidding allows it to be recycled in the wastepaper stream. Once the lid is separated from the cup completely, it should be disposed in the dedicated bin for a proper collection and recycling.

APPLICATIONS

- Yogurts
- Desserts
- Fresh cheese
- Cream cheese
- Dressings
- Dips
- ... and others

Paper (up to 90%)

Barrier layer

Heat seal laquer
