

# rPET lidding solutions

## THE ECO-FRIENDLY ALTERNATIVE PET

### WHAT IS rPET?

Recycled Polyester known as rPET is created by recycling previously used plastics and reduces the need to use new virgin feedstock.

### KEY ADVANTAGES

- ✓ Meets plastic tax requirements
- ✓ Approved for direct food contact
- ✓ Available with a PCR content up to 50%
- ✓ Excellent optical appearance
- ✓ Good barrier properties with optional metallization

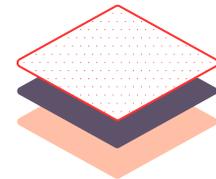

For the most part rPET looks and feels the same as standard PET and has the same optical and machine properties. Recycling plastics also helps decrease the amount of plastic waste that enters landfills.

### APPLICATIONS

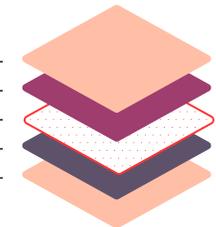

Reel fed lidding and die cut lids including

- ✓ dips
- ✓ yogurt
- ✓ cream
- ✓ fresh cheese
- ✓ sauces
