**Hygienic drinking & pouring
enjoyment – less plastic waste**

**THE MORE SUSTAINABLE ALTERNATIVE WITH LESS PLASTIC WASTE –
FOR ALL OF US AND THE ENVIRONMENT.**

ComforLid by Constantia Flexibles is a perfect addition to Constantia's Ecolutions family product range. It replaces a conventional plastic cup with a snap on lid or a straw by an integrated drink opening in the lid, which makes a lasting contribution to reducing plastic waste.

HOW DOES ComforLid WORK?

The innovative ComforLid is a double layer die cut lid composed of one aluminum layer and a coextrusion plastic layer. The consumer peels off the aluminum layer; the plastic layer with the perfectly placed opening remains on the cup.

- ✓ Convenient drinking pleasure without the need for a plastic snap-on lid and straw
- ✓ Infinite openings shape options
- ✓ Hygienically clean and protected drink opening, which – unlike a plastic snap-on – cannot be removed before consumption or get lost.

HOW IS ComforLid PRODUCED?

The opening in the plastic layer is created using a laser, which means there is an infinite number of different shapes that can be created.

- Runs on conventional filling lines
- No investment required on the customer side
- Seals to PP cups

WHAT PRODUCTS CAN ComforLid BE USED ON?

This packaging solution is ideally suited for liquids like coffee drinks, drinking yogurts, whey or soft drinks. The customizable and precise opening makes ComforLid also well suited for:

- Chocolates
- Herbs
- Chewing gum
- Fruit gums
- Sweets
- Cheese in brine
- and many more.
